DIBBLE HIGH SCHOOL BOND 2022

Past

The district supported a series bond issue in 2013 to fulfill our need for a cafeteria renovation and new elementary.

The district has kept the millage structure below the rate that was approved by the voters. This provided for lower property taxes and savings to the patrons.

Current

The district will propose a 15.45 million dollar bond issue on August 23, 2022. This bond issue will commit to the exact same millage rate as the 2013 bond issue.

The current state of our High School is such that it needs major repairs and remodeling. Portions of the High School were constructed in the 1930's.

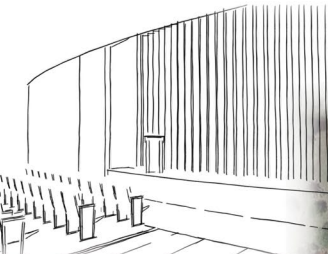

Our athletic lights were installed 20 plus+ years ago. They were installed using "used" power poles. One pole has already failed and other lost a portion of the fixture during a windstorm. This is a danger to our students and campus as they are well beyond their life expectancy.

Future

The district has created a "Grand Plan" addressing the predicted needs within the next series bond proposal.

For Specific Questions please contact Chad Clanton at 405-401-7375 or clanton@dibble.k12.ok.us

NOT IN BOND 2022
